Aesthetic Zone Implants: From Site Preparation to Long-Term Maintenance – Hands On Program

In the esthetic zone, restoration with dental implants can pose a challenge. The primary difficulty is using implants to support and recreate soft tissue esthetics. This full-day HANDS-ON program will address the peri-implant complex. **Topics will include:** 1) How and when to socket graft. 2) How to imitate gum tissue. 3) How to maintain bone and soft tissue. The hands on portion will include socket grafting, temporary fabrication and experience with a unique off-angle screw.

Dr. Fred Li DDS, FICOI, AFAAID

Dr. Frederick Li graduated from the University of Manitoba College of Dentistry, then completed two years of dental residency in hospital facilities associated with Cornell Medical Center and Columbia University in New York. He gained surgical implant experience from some of the top implant surgeons and prosthodontists in the Greater New York Region. Dr. Li is also a graduate of the Misch Implant Institute, a fellow of the International Congress of Oral Implantologists and an associate fellow of the Academy of Implant Dentistry. Dr. Li limits his practice to implant dentistry in Vancouver. He mentors a large surgical implant study club locally and also gives various other programs in British Columbia on implant dentistry.
