## **The World's First Dry-Cut Dust Control Power Cutter**

### **PC913 POWER CUTTER**

**Construction Supplies and Equipment**

*An Employee Owned Company*

***The Real Contractor's Choice!®***

### **IT'S NOT GOING AWAY**

You know it's a problem. You've tried to avoid it, ignore it, or just deal with it, but all along you know...it's not going away.

Dust. Or slurry, take your pick.

Your job site is going to look a lot different with no dust and without the mess from wet-cutting. You and your crew won't be spending time every day cleaning up dust or slurry, and you'll be cutting right at the work area without the back-and-forth to the saw 100 times a day. You and your crew won't be breathing dust, and you'll never have to worry about dust standards and regulations.
