Regional Sales Manager **Chad Davis** notes that Jon comes to Diamond V with 30 years of production dairy management experience, most recently as the general manager at Sunnyside Dairy LLC near Sunnyside, WA where he had been employed for the past 18 years.

At Sunnyside Dairy, Jon was responsible for all aspects of daily dairy operations and business vision for the future, including herd health and cow welfare, milk production, systems management, leadership and team building, and assessing the financial results of the dairy operation.

“It was Jon’s leadership, vision, and management that oversaw the expansion activities at the dairy from 3,700 mature cows to 7,550 mature cows,” Chad says. “This expansion also led to a doubling of heifer requirements, farm ground needs, and labor requirements – from 40 to 80 employees.”

Prior to joining Sunnyside Dairy, Jon managed other successful dairies in California, Arizona, and Washington. Jon also was a district sales manager for American Breeders Service (ABS), managing a team of independent breeders in Central California and Hawaii.
